

**Job Title: Senior Software Engineer / Application Developer**

**Location:** [Company Location]

**Job Description:**

We are seeking a highly skilled and experienced Senior Software Engineer to join our dynamic team. The ideal candidate will have a strong background in application development, database design, and management, with expertise in C#, Oracle SQL, SQL Server, and a variety of other technologies. This role requires a blend of technical expertise, project management, and leadership skills to drive complex software projects, collaborate with cross-functional teams, and deliver high-quality solutions that meet business needs.

**Key Responsibilities:**

- Design, develop, and maintain web applications and software solutions using **C#, ASP.NET, ADO.NET**, and **PL/SQL** to meet business requirements.
- Manage and optimize **Oracle SQL, SQL Server**, and **SQL\*Plus** databases, ensuring efficient data management and system performance.
- Implement and manage **Database Design** and **Database Administration** to ensure scalability, reliability, and security of applications.
- Lead teams in the design and development of IT solutions, leveraging **Agile Methodologies** to ensure timely and successful delivery.
- Collaborate with stakeholders to gather and analyze **Requirements Analysis**, defining and documenting technical specifications for new projects.
- Contribute to **Software Project Management** by providing technical guidance and leading efforts in **Project Management**.
- Develop and implement **Business Intelligence** strategies, optimizing data retrieval, reporting, and visualization.
- Maintain and manage **SharePoint, SharePoint Designer**, and **TFS** for efficient document management and team collaboration.
- Oversee **Application Development**, ensuring adherence to **SDLC** practices, and integrating **XML** for data exchange.
- Lead and mentor junior team members, providing technical support and guidance in **Team Leadership**.

**Required Skills and Qualifications:**

- Proven experience with **C#, ASP.NET, ADO.NET**, and other application development technologies.
- In-depth experience with **Oracle SQL, SQL Server, PL/SQL**, and **SQL\*Plus** for database design and management.
- Strong understanding of **Database Administration, Data Management**, and **Information Technology**.

- Experience with **TFS, SharePoint**, and **SharePoint Designer** for version control, collaboration, and content management.
- Solid background in **Agile Methodologies, SDLC**, and **Project Management**.
- Expertise in **Business Intelligence, Requirements Analysis**, and **Software Development** lifecycle.
- Strong leadership and **Tactical Planning** capabilities to manage technical teams and deliver high-quality applications.
- Excellent communication and interpersonal skills, with the ability to work collaboratively across different departments.
- Strong problem-solving skills and the ability to adapt to evolving technology landscapes.

#### **Preferred Skills:**

- Experience in **Microsoft SQL Server** management and deployment.
- Knowledge of **Web Applications** development and **IIS** configuration.

#### **Education and Experience:**

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Minimum of 5 years of experience in a senior technical or leadership role.
- Demonstrated success in leading software development teams and delivering complex projects on time.

#### **Benefits:**

- Competitive salary and benefits package
- Opportunities for professional growth and development
- Dynamic and collaborative work environment

If you have the skills and passion for technology and are ready to take on a leadership role in software development, apply now to join our team!
